**CONSTRUCTION OF THE
PI'IHONUA-KŪKŪAU RESERVOIR AND
TRANSMISSION WATERLINE IMPROVEMENTS
Information Sheet**

Overview

In alignment with the Department's goal of upgrading water infrastructure, the construction of the Pi'ihonua-Kūkūau Reservoir, will improve system reliability to the greater Kaumana and Hilo areas. The new 2.0-million-gallon water reservoir is located on Haleloke Street and also includes the installation of waterlines on Haleloke Street, Hokulani Street and Kaūmana Drive.

Project Status Updates

Anticipated completion date: November 2018

- **Haleloke Reservoir:**
A 2.0-million-gallon reinforced concrete reservoir has been constructed and the site was fenced. The construction of an inlet control valve station and the electronic monitoring systems have yet to be completed. Demolition of an existing reservoir near Chong Street will commence once the new reservoir is in use.
- **Hokulani Street Pipe Installation:**
Approximately 3,000 linear feet of 16-inch pipe has been installed and connected to the existing water system.
- **Kaūmana to Kūkūau Street Pipe Installation (along a waterline easement):**
Approximately 3,400 linear feet of 16-inch pipe has been installed and connected to the existing water system. An all-weather road and appurtenances have been installed.

The Department appreciates the community's understanding while the work nears completion and apologizes for any inconvenience these disruptions may have caused.
