

# Our Mission:

Providing **Safe & Dependable** Drinking Water at a **Reasonable** Cost

## *How is your money spent?*

### ***Water Quality***

Providing safe drinking water is the foremost goal of the Department. We intend to meet the stringent requirements of the federal Safe Drinking Water Act. This includes testing of the water on a regular basis, developing better sources, and furnishing more treatment facilities.

### ***Dependable Systems***

Making sure that you have water involves drilling more wells (since well water is more dependable and less susceptible to droughts than surface sources); repairing and replacing outdated systems; and installing new modern equipment to monitor our systems.
