Such inspection may include, without limitation, visual inspection, review of fabrication and assembly, and verification of compliance with the Contract Documents. The Contractor shall ensure that the manufacturer provides complete, unobstructed access to the equipment, and as required, to those areas of the manufacturing facility necessary to permit a thorough inspection. The Contractor shall include this inspection and access requirement in all applicable subcontracts and purchase orders and shall be solely responsible for coordinating and enforcing compliance with this requirement.*
- ii) *Any inspection performed by the Department or its authorized representative is for the Department's convenience only and shall not constitute acceptance of the equipment, approval of design, materials, workmanship, or processes, nor a waiver or release of any requirement of the Contract Documents.*

to coordinate any desired inspection. The Contractor shall bear full responsibility for and shall not be entitled to any extension of time or additional compensation for, any delays resulting from the Contractor's failure to promptly notify the Department following receipt of notice from the manufacturer that fabrication is complete. Upon receipt of the Contractor's notice, the Department shall provide written confirmation of its intent to inspect or waive inspection; however, failure of the Department to elect to inspect shall not relieve the Contractor of its obligation to comply fully with the Contract Documents, nor shall such waiver constitute acceptance of the equipment.

- iv) The manufacturer shall remain solely and fully responsible for the equipment, including but not limited to its design, fabrication, materials, workmanship, performance, completeness, and compliance with the Contract Documents, whether or not any inspection is performed and whether or not defects, deficiencies, or errors are discovered during such inspection.*
- v) Failure by the Department or its authorized representative to identify any defect, deficiency, or nonconformance during inspection shall not relieve the manufacturer of responsibility for correcting such defect, deficiency, or nonconformance, nor shall it limit or reduce any warranty, guarantee, indemnity, or other obligation of the manufacturer under the Contract Documents or applicable law.*
